

NTK.365: #0016 – System requirement updates for iOS

NTK.365	#0016 – iOS System requirements update <ul style="list-style-type: none">• Teams iOS• Outlook iOS• WatchOS
Title:	Microsoft updates system requirements for Teams and Outlook on iOS and WatchOS
Available:	October/November 2021

Teams on iOS:

Microsoft will be retiring the Teams mobile support on iOS version 13 and below. Instead, MS recommends that users upgrade to newer iOS builds, which is where MS will continue to invest development resources. Additionally, Microsoft encourages users to update to the newest version of the Teams mobile app if they're running builds older than 1 year.

Outlook for iOS:

- Outlook for iOS is supported on the two most recent versions of iOS.
- With iOS 15 currently in beta, Outlook for iOS is preparing to remove support for iOS 13.
 - Once iOS 15 is released to GA, the system requirements for Outlook for iOS will be updated to reflect support for iOS 15.
- Microsoft will update the minimum system requirements for the Outlook for iOS app from iOS 13 to iOS 14.

watchOS:

- Microsoft will remove support for watchOS 6.
- watchOS 7 and 8 will be the only supported versions for Apple Watch.
